

## HBAWS CE for GCs Continuing Education Class Descriptions

Class Date	Course Name	Course Description
20-Nov	<b>M2020 Mandatory CE Course</b>	Mandatory 2-hour course produced by the Board with information about changes in the laws and rules and other content applicable to general contracting.
20-Nov	<b>BT212: Sealed Crawlspace</b>	Students in this course will achieve a working understanding of how a sealed crawl space differs from a vented crawl space. They will be able to layout a construction sequencing based upon best practices for installation. Students will be able to answer questions, both technical and basic, on the advantage of a sealed crawl space and as to why a sealed crawlspace did not function as expected
20-Nov	<b>BT108: Resource Efficiency and Materials</b>	Build confidence in your product by learning the best practices for water management and resource efficiency. Maintaining a clean and dry building assembly ensures not only jobsite appearance but longevity of the building structure as well.
24-Nov	<b>PM201: Completing Your Projects on Time</b>	An in depth look at the basics of project scheduling and how to create a schedule by hand. We will also take a brief look at MS Project and discuss how its use can save time and money as compared to conventional methods of scheduling.
24-Nov	<b>DS 103: What's New with Kitchen and Bath Trends</b>	We will summarize information provided by national organizations and speakers relating to the hottest trends for kitchen and bath designs that we are seeing today. Then we will discuss these trends from both a national and regional standpoint.
24-Nov	<b>M2020 Mandatory CE Course</b>	Mandatory 2-hour course produced by the Board with information about changes in the laws and rules and other content applicable to general contracting.
